

Fuse Bars

for the automotive industry

Fuse Terminal System
US Patent 6,855,008 B1

Flexibility Paired with Versatility Supports Endless Configurations

Our fuse bars eliminate the need for a fusible link wire and each design makes it easy to add to any Royal Power Solution stamped battery terminal. This value-added product makes the engineering process proceed more smoothly.

Simplicity in field maintenance and service

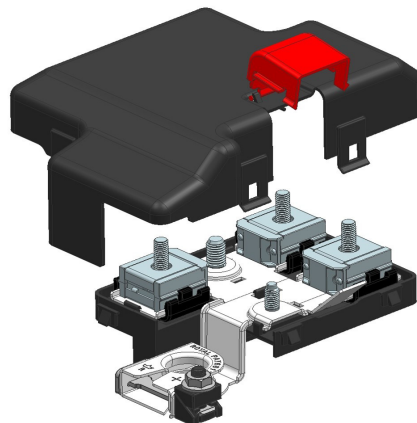

Reduces harness complexity

Has a replaceable fuse for easy fault detection

Eliminates splice circuit

When a fuse is blown, only the fuse is replaced, NOT the entire fuse link harness

REPLACEABLE FUSE BLOCK PACKAGES
